- A PC with an Intel Pentium or Compatible processor 64 MB of RAM (128MB under Windows XP/Windows 2000). Approximately 6MB of free hard disk capacity for the software. A natively supported or TWAIN compliant flatbed or sheet feed scanner. If you are working only with image files or pre-defined form templates no scanner is required. Windows 9X or Windows XP, Windows NT/ Windows 2000, ME, 98, 95

* Formulator 3.0 PRO upgrade requires user to have installed Formulator 2.5 version on their computer prior to installation.

DESCRIPTION

Converting your paper forms to digital has never been so easy!

Formulator 3.0 Pro upgrade is your complete solution that enables organizations and individuals alike to convert any paper form to an electronic form and automate form filling and form data management in one powerful software program. Upgrading from Formulator 2.5 is a wise choice with an updated user interface, improved data base interface for importing or exporting data from any ODBC data base format plus totally overhauled and added features like scanning in Color or Grayscale, accepting multiple page forms and a powerful Skewed Page feature that allows adjusting forms without rescanning. Formulator 3.0 creates an easy environment for anyone to create digital forms from any kind of paper form.

BENEFITS:

- Increase productivity by automating form filling
- Drastically cut the high cost associated with filling out forms by hand
- Free Tech Support for Registered Users
- Fill out and print forms electronically
- Import data from any database format
- Solve field dependencies with arithmetic zones
- One of the most efficient form software programs available

NEW FEATURES IN VERSION 3.0 UPGRADE:

- Page adjustment feature for skewed forms
- New zone type "Formula" for arithmetic dependencies
- Multi-line text fields with adjustable line pitch
- Scale-to-gray feature for better viewing quality
- Completely overhauled database interface
- Printing multiple records in one step
- Multiple Document Interface
- Accepts multiple page forms
- Scanning and image import using grayscale or color
